

*your position is our focus*

## New world record: AMY – the smallest GPS module ever

- Industry's smallest GPS receiver module: 6.5 x 8 x 1.2 mm
- No additional components
- No host integration required
- 50-channel u-blox 5 engine with 1 million correlators
- Operates at 1.8 V or 3 V
- Variety of interfaces: UART, USB, I<sup>2</sup>C, SPI
- Assisted GPS supported

**u-blox' 5<sup>th</sup> generation**  
**has redefined the boundaries of GPS performance**

**AMY**  
GPS module  
6.5 x 8 mm
