1 Introduction

u-blox has identified a problem with the default PRL (Preferred Roaming List) used by LISA-C200 Sprint units. This Information Note describes the problem and details corrective actions put in place by u-blox.

2 Affected products

Product Name	Ordering number	Type number
LISA-C200	LISA-C200-02S	LISA-C200-02S-01
LISA-C200	LISA-C200-03S	LISA-C200-03S-00
LISA-C200	LISA-C200-04S	LISA-C200-04S-00

3 Description of the issue

Sprint has been updating its network PRLs. As a consequence, in some areas within the US, LISA-C200 Sprint modules that are not yet activated might not be able to register to the Sprint/Aeris network.

Areas potentially affected by the issue are:

Logan, WV	Spokane, WA	Findlay-Tiffin, OH	Rochester, NY	Lihue, HI
Savannah, GA	Des Moines, IA	Marion, OH	Norfolk-Virginia Beach-Newport, VA	Honolulu, HI
Gainesville, GA	Davenport, IA-Moline, IL	Athens, OH	Richmond-Petersburg, VA	Kahului, HI
Las Cruces, NM	Provo-Orem, UT	Chillicothe, OH	Daytona Beach, FL	Gainesville, FL
Pittsburg-Parsons, KS	Albany, GA	Columbus, OH	Lakeland, FL	Jacksonville, FL
Victoria, TX	Glens Falls, NY	Parkersburg, WV	Melbourne, FL	Greenville-Spartanburg, SC
Harrisburg, PA	Macon, GA	Zanesville, OH	Orlando, FL	El Paso, TX
Lancaster, PA	Cincinnati, OH	Portland, ME	Sarasota, FL	Las Vegas, NV
York, PA	Dayton-Springfield, OH	Buffalo-Niagara Falls, NY	Hilo, HI	

Active units already in the field and new units successfully registering for the first time in areas not affected by the issue will automatically update the PRL and will continue to work normally in all areas.

4 Corrective actions

The new Sprint PRL has already been deployed in production, and therefore all units produced after calendar week 26 are not affected by this issue. (The calendar year and week are printed on the module label in the format yy/ww.)

In order to update the PRL on not activated LISA-C200 Sprint modules, please contact the u-blox Technical Support team.
