REMARKS AND COMMENTS:

EMF exposure only evaluated when the antenna used with the device is located at a minimum distance of 20 cm from the user.

Device tested with reference antenna as specified below:

Model: GSA.8821
 Antenna gain: E-GSM 900: 3.9 dBi
 DCS 1800: 4.1 dBi

Antenna specifications as declared and defined by the manufacturer. Antenna should be installed following manufacturer instructions. The use of different antennas may affect the compliance; if the manufacturer is in doubt about the compliance then the equipment with the new antennas must be assessed to demonstrate compliance with the essential requirements of the 1999/5/EC Directive. It should be noted that assessment does not necessarily lead to testing.

The devices also operate in other non EU frequency bands. This operation has not been evaluated in this opinion.
