u-blox reports first half 2020 financial results

Thalwil, Switzerland – August 20, 2020 – u-blox (SIX:UBXN), a global leader in wireless and positioning technologies, today announced its financial results for the six months ended 30 June 2020.

Financial Summary

- Revenue of CHF 174.0 million compared to revenues of CHF 190.6 million H1 2019, a decline of -8.7% (-5.6% at constant exchange rates)
- Gross profit (adjusted) of CHF 79.4 million compared to CHF 86.1 million in H1 2019, a decline of -7.8%, and equivalent to an adjusted gross margin of 45.6% versus 45.2% in the prior year period
- EBITDA (adjusted) of CHF 24.1 million, compared to CHF 32.7 million in the prior year period
- EBIT (adjusted) of CHF 13.2 million, compared to CHF 19.7 million in the prior year period
- Net profit (adjusted) before minority interests of CHF 4.7 million, compared to CHF 13.6 million in the prior year period
- Cash flow from operating activities of CHF 13.9 million in H1 2020, compared to CHF 33.1 million in the prior year period
- Free cash flow of CHF -21.9 million (CHF -8.4 million before acquisitions) in H1 2020, compared to CHF 0.5 million in the prior year period
- CHF 100.1 million of cash and cash equivalents at 30 June 2020, compared to CHF 127.4 million at year-end 2019 and CHF 122.4 million at 30 June 2019
- u-blox initiated cost improvement measures that are expected to generate annual savings of approximately CHF 15 million. As part of these measures, one large non-revenue generating program was discontinued, and measures will be taken to redeploy these and other resources efficiently and in a cost effective manner to core business areas.

Business Highlights

- Successfully acquired IoT Communication-as-a-Service Provider Thingstream in April 2020, consistent with the company’s strategy to expand its services portfolio by providing customers with a complete and comprehensive IoT connectivity solution.
- Launched the company’s latest contribution to vehicle-to-everything (V2X) technology, the short range VERA-P3 V2X module.
- Debuted the global LPWA cellular module SARA-R422 with increased security and positioning features.
- The M9 positioning platform was expanded with additional features. This ultra robust M9 technology platform will serve demanding automotive and high end telematics applications.

Financial Overview

For the first half of 2020, u-blox generated revenues of CHF 174.0 million, EBIT (adjusted) of CHF 13.2 million and EBITDA (adjusted) of CHF 24.1 million. Revenues in all regions were lower in H1 2020 compared to the same period last year, reflecting the impact of the COVID-19 pandemic. In particular, demand in the automotive end market and certain industrial sectors were substantially affected. The weakened USD/CHF exchange rate had a negative impact of -3.1%.

In APAC, revenues declined to CHF 70.1 million in H1 2020 from CHF 71.5 million in H1 2019 (-2%). While revenues benefitted from the steady development and deployment of 5G networks, automotive ramp-ups with new customers, and demand for drones, these positive developments were offset by decreased demand
from certain sectors of the automotive market and also various telematics applications used in industrial and consumer product markets.

Revenues in EMEA decreased to CHF 51.7 million in H1 2020 from CHF 61.6 million in H1 2019 (-16%) due to declines in the broader automotive and mobility end markets. Automotive OEMs experienced prolonged shutdowns due to the pandemic, and the mobility markets, where applications are especially used in shared services such as scooters and e-bikes, were particularly impacted by COVID-19. Areas of revenue growth in EMEA included IoT applications for smart cities which was mostly driven by demand from local governments. Additionally, there was solid demand for driver assistance and point-of-sale device applications.

AMEC revenues decreased to CHF 48.9 million in H1 2020 from CHF 56.6 million in H1 2019 (-14%). Decreased demand in general consumer applications and fleet management customers were the primary reasons for the decrease in revenues. Partially offsetting this decline was increased year-on-year demand from industrial automation applications, such as metering, as well as fitness applications.

u-blox operates in two segments:

- Positioning and wireless products
  u-blox develops and sells chips and modules for positioning and wireless connectivity that are used in automotive, industrial and consumer applications. For H1 2020, revenue was CHF 173.8 million compared to CHF 190.4 million in H1 2019.

- Wireless services
  u-blox also offers wireless communication technology services in terms of reference designs and software. For H1 2020, revenue for wireless services was CHF 16.7 million compared to CHF 16.0 million in H1 2019 (including intra group revenue).

Adjusted gross profit decreased by -7.8% to CHF 79.4 million in H1 2020 from CHF 86.1 million in H1 2019, resulting in an adjusted gross profit margin of 45.6% (H1 2019: 45.2%). The higher adjusted gross margin was due to favorable product mix during H1 2020 compared to H1 2019.

Adjusted operating expenses, which include R&D, distribution and marketing and G&A expenses, totaled CHF 66.7 million for H1 2020, compared to CHF 67.8 million in H1 2019. The higher R&D and G&A expenses were offset by lower distribution and marketing expenses. As a percentage of revenue, operating expenses were 38.3% of revenue compared to 35.6% last year.

R&D expenses (adjusted) remained stable at CHF 39.5 million in H1 2020 compared to CHF 39.8 million during the same period in 2019. As a percentage of revenue, adjusted R&D expenses in H1 2020 were 22.7% of revenue compared to 20.9% in H1 2019.

Distribution and marketing expenses (adjusted) in H1 2020 were CHF 15.8 million compared to CHF 17.8 million in the previous year period. As a percentage of revenue, distribution and marketing expenses (adjusted) were 9.1% in H1 2020 compared to 9.3% in H1 2019. Distribution and marketing expenses declined as expositions, conferences and other large-scale events were cancelled or moved to a virtual setting due to the pandemic.

Finance costs of CHF 3.5 million consisted primarily of interest payments for the two outstanding bonds and unrealized foreign currency losses. Share of loss of equity-accounted investees net of tax was CHF 1.9 million in H1 2020.

During the first half of 2020, u-blox recognized an impairment charge of CHF 74.1 million due to current market conditions mainly in automotive, changes in business plan expectations and refocusing of various programs. The company’s existing lines of product offerings remain unaffected.
Net profit (adjusted) before minority interests was CHF 4.7 million, compared to CHF 13.6 million last year. Diluted EPS (adjusted) in H1 2020 was CHF 0.67 per share compared to CHF 1.96 per share in H1 2019.

At 30 June, 2020, u-blox had a strong balance sheet with an equity ratio of 54.2%. Cash, cash equivalents, and marketable securities totaled CHF 100.1 million as of 30 June, 2020, compared with CHF 127.4 million at the end of 2019 and CHF 121.0 million at 30 June, 2019. u-blox generated cash from operating activities of CHF 13.9 million through H1 2020, a decline of 58.2% compared to the previous year (H1 2019: CHF 33.1 million), due to lower business levels and an increase in net working capital. This increase in net working capital was driven by lower demand which increased inventory levels. Investments in property, plant and equipment and intangible assets totaled CHF 22.2 million for H1 2020, compared to CHF 29.2 million in H1 2019. Free cash flow (before acquisitions) was CHF -8.4 million, compared to CHF 3.9 million last year.

**Acquisition of Thingstream**

On 1 April, 2020, u-blox acquired the IoT communication-as-a-service provider Thingstream. Thingstream provides a comprehensive, end-to-end solution for global IoT connectivity, offering its product “as-a-service” which provides predictable cost and on-demand scalability for customers. The acquisition of Thingstream aligns with and accelerates u-blox’s strategy to expand its services business into a new dimension, the IoT Sphere. The IoT Sphere will provide customers with a reliable, smart and secure solution to connect sensor data to their cloud enterprise. With this capability, u-blox moves forward in achieving unique silicon-to-cloud differentiation. The integration of Thingstream was successfully completed during the first half of 2020.

**Management**

u-blox has appointed Carl Bellanca as new Head of Sales Americas to lead u-blox’s initiative to grow sales in the U.S. and its overall global distribution capabilities. Mr. Bellanca brings over 25 years of experience in sales and management positions, most recently as VP Sales – East at u-blox America since 2018. Bellanca will report to Markus Schaefer, Executive Director for Global Marketing and Sales in his new role.

Product announcements
During the first half of 2020, u-blox made advances in certain important product offerings. The company recently announced its latest contribution to vehicle-to-everything (V2X) technology, the short range VERA-P3 V2X module. Based on u-blox’s existing UBX-P3 V2X chip, VERA-P3 puts automotive OEMs, Tier-1s, and manufacturers of traffic management infrastructure on a fast track to integrating V2X technology into their platforms and solutions and deploying them commercially. Additionally, the company introduced the global LPWA cellular module, SARA-R422, which provides increased security and positioning features [compared to previous generations / other available products]. The SARA-R4 series is ideal for a wide range of mission-critical IoT solutions such as connected healthcare, industrial monitoring, point of sale and vending terminals, tracking and telematics devices, as well as smart lighting solutions and building automation.

Management Commentary
Thomas Seiler, u-blox Chief Executive Officer, commented, “After a solid first quarter, our business became increasingly impacted by the COVID-19 pandemic and the unprecedented effect it has had on the global economy. In particular, in EMEA and the Americas, we experienced declining demand, predominantly in the automotive end market and certain industrial markets such as telematics and smart mobility, as production and business shutdowns affected sales to customers in these sectors. In APAC, where the initial outbreak occurred and, accordingly, where the economy reopened earlier, revenues decreased less on a year-on-year basis. The development and expansion of 5G networks in China and Korea, drone applications and several automotive ramp-ups drove demand for our products in this region. We are encouraged by trends observed in APAC, and as businesses and societies continue to reopen across EMEA and AMEC we expect similar developments in these regions.”

Mr. Seiler continued, “Our supply chain remained fully operational and we have experienced no significant issues or interruptions with respect to product availability and delivery. For the safety of our employees, customers and business partners, we instituted company-wide measures for employees to work remotely beginning in mid-March. Our existing infrastructure was key in facilitating efficient online collaboration, and therefore this transition has not impacted our productivity in sales and marketing, R&D and other operational areas of the business. In fact, we implemented new measures for conducting R&D while operating remotely, and we have been maintaining full R&D capacity to keep our innovation pipeline continually flowing. However, we also defined measures to reduce our operational expense significantly. Throughout the pandemic, no employee was subject to reduced working schemes.”

Mr. Seiler said, “The core fundamentals and underlying drivers of our business remain solid and we are pleased with our ability to service customers and improve the business despite these challenging times. We experienced interesting ramp-ups of new applications that should accelerate our business once economic conditions improve and stabilize. These new applications include a variety of classical applications like infotainment, as well as new applications in the areas of automated vehicles, building automation and smart cities. We also benefited from the strong build-out of network capacity, both cellular and point-to-point.”

**Outlook**

While we remain confident in the underlying growth drivers to our business, particularly wireless content extension in automotive and the expansion of industrial IoT, the near term remains difficult to predict with respect to how quickly and strongly economies will recover across our regions. For these reasons, we are retracting our guidance that was presented on 13 March 2020 and the mid-term guidance, and we will not be issuing guidance for the 2020 financial year.

\(^1\) Net cash used in investing activities consists of investments into property, plant and equipment of CHF 2.9 million (June 30, 2019 CHF 3.4 million) and investments into intangible assets of CHF 18.7 million (June 30, 2019 CHF 26.4 million) in the first half year 2020.

\(^2\) Net cash provided by financing activities contains the exercise of employee stock options of CHF 0 (June 30, 2019 CHF 91 thousand), the dividend payment out of reserves from capital contributions of CHF 0 (June 30, 2019 CHF 11.1 million).

These condensed interim financial statements should be read in conjunction with the accompanying notes.
Notes to the condensed consolidated interim financial statements

1 Basis of preparation of the condensed consolidated interim financial statements

The condensed consolidated interim financial statements of u-blox Holding AG (‘u-blox’ or the ‘Group’) were prepared in accordance with IAS 34 “Interim Financial Reporting”. These condensed consolidated interim financial statements do not include all the notes contained in the consolidated annual financial statements, and for that reason should be read in conjunction with the consolidated annual financial statements for the year ended December 31, 2019.

The condensed consolidated interim financial statements have been prepared in Swiss francs (CHF), rounded to the nearest thousand, except for per share amounts.

The preparation of the condensed consolidated interim financial statements requires management judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses as well as disclosure of contingent assets and liabilities.

Although these judgments, estimates and assumptions are based on management’s best knowledge of current events and actions, actual results may ultimately differ from those estimates.

In these condensed consolidated interim financial statements significant estimates and assumptions made by management are not different from those disclosed in the consolidated financial statements for the year ended December 31, 2019.

Income taxes are recognized based on best estimate of the weighted average annual tax rate for 2020.

The Group operates in markets where no significant seasonal or cyclical variations in revenue are experienced during the financial year.

The following rates were used to translate the financial statements of the Group’s entities into CHF for consolidation purposes:

<table>
<thead>
<tr>
<th></th>
<th>Average rate</th>
<th>Closing rate</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>EUR</strong></td>
<td>1.06450</td>
<td>1.06404</td>

<td>0.94729</td>
</tr>
<tr>
<td><strong>GBP</strong></td>
<td>1.21734</td>
<td>1.17457</td>
</tr>
</tbody>
</table>

Changes in accounting policies

Except as described below, the accounting policies applied in these interim financial statements are the same as those described in the Group’s consolidated financial statements for the year ended December 31, 2019. The changes in accounting policies are also expected to be reflected in the Group’s consolidated financial statements for the year ended December 31, 2020. With respect to IFRS 16 Leases, the Group has chosen to apply the practical expedient related to COVID-19 rent concessions.
2 Segment information

In accordance with the management structure and the reporting made to the Board of Directors (the Group’s Chief Operating Decision Maker, which is the Board of Directors of u-blox Holding AG), the reportable segments are the two operating Corporate Groups ‘Positioning and Wireless products’ and ‘Wireless services’. Segment accounting is prepared up to the level of Operating Profit (EBIT) because this is the key figure used for management purposes. All operating assets and liabilities that are directly attributable or can be allocated on a reasonable basis are reported in the respective Corporate Groups. No distinction is made between the accounting policies of segment reporting and those of the consolidated financial statements. No operating segments were aggregated.

The following reportable segments were identified.

Positioning and Wireless products
The Group develops and distributes GPS/GNSS positioning receivers and wireless communication modules which are mainly used in automotive, industrial and consumer applications. Products are marketed and sold by the u-blox worldwide sales organization. The products are manufactured by third parties. The Group coordinates the whole supply chain and manages the world-wide production and distribution of the products.

Wireless services
Since the acquisitions of u-blox Italia S.p.A. and u-blox San Diego, Inc., u-blox offers also services in the wireless communication technology which forms a separate business segment as these products consist of delivery of reference designs and software.

4 Impairment of intangible assets

During the first half of 2020, the Group recognized CHF 74.1 million of impairment losses on intangible assets. The impairment was due to current market conditions mainly in automotive, changes in business plan expectations and refocusing of development projects. Each of those development projects was deemed an individual cash generating unit (‘CGU’).

The impairment charge in 2020 was recognized in ‘research and development expenses’. The charge relates to intangible assets in the positioning and wireless products segment. The respective CGU’s were fully written off as the recoverable amount was deemed to be zero.

</tbody>
</table>
The table above shows the carrying amount of all financial instruments per category. With the exception of financial liabilities and lease liabilities, financial instruments correspond approximately to the fair values in accordance with IFRS. The fair value of financial liabilities is disclosed in the table “Fair value hierarchy”.

Fair value hierarchy
The different levels of financial instruments carried at fair value or for which the fair value is disclosed have been defined as follows in the table below:

<table>
<thead>
<tr>
<th>Carrying amounts</th>
<th>Fair value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total</td>
<td>Level 1</td>
</tr>
<tr>
<td>-----------------------------------</td>
<td>------------</td>

</tr>
<tr>
<td>Total liabilities</td>
<td>120'616</td>
</tr>
</tbody>
</table>

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: inputs other than quoted prices included within level 1 that are observable for the asset or the liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: inputs for assets or liabilities that are not based on observable market data (unobservable inputs).

6 Nominal share repayment

On April 23, 2020 the Annual General Meeting of u-blox Holding AG approved a nominal share repayment of CHF 0.60 per share.

A total nominal share repayment in the amount of CHF 4.27 million was paid out on July 14, 2020, whereof CHF 107 thousand pertained to treasury shares held.

7 Guarantees, pledges in favor of third parties and other contingent liabilities

At June 30, 2020 and December 31, 2019 there were no guarantees in favor of third parties.

The group is not exposed to any significant other contingent liabilities. There is no known threatened or pending litigation against any group company.

8 Acquisition

On April 1, 2020, the Group acquired IoT Communication-as-a-Service Provider Thingstream in an agreement, which is a business combination according to IFRS 3.

The purchase price is CHF 11.3 million. The company will finalize the purchase price allocation in the second half of 2020 (unaudited).

9 Impact of COVID-19 Pandemic

The Group has assessed accounting matters that generally require consideration of forecast financial information taking into account the potential future impacts of the COVID-19 pandemic. The assessed financial positions, estimates and assumptions include, but are not limited to, allowances for doubtful trade receivables and inventory, book value of goodwill, intangible assets and property, plant and equipment as well as defined benefit pension plan assets and liabilities. Any continued negative impact of the pandemic in the second half year 2020 may affect the future assessment of these or other matters.

Bad debt expenses and overdue receivables remain on a relatively low level. There were no material write-offs of inventory recorded which can be directly related to the pandemic.

The impairment recorded to intangible assets in the first half of 2020 was not exclusively related to the pandemic.

No impairment issues were noted for financial assets, although the volatility in global markets had a corresponding impact on the carrying value of equity investments held at fair value. Similarly there was volatility in the fair value of pension plan assets and discount rates during the six months ended June 30, 2020.

Although there was no significant impact from the areas assessed on the Group’s Interim Financial Statements, the Group will continue to monitor these areas of increased judgments and risk for material changes also in the second half of 2020.

10 Events after the balance sheet date

On August 20, 2020 The Board of Directors authorized these condensed consolidated interim financial statements for publication.
