3 Description

u-blox NEO-F10N has reached the initial production (IP) status.

The NEO-F10N is built on the u-blox F10 dual-band GNSS technology using L1/L5 GNSS bands, providing solid meter-level position accuracy in urban areas.

NEO-F10N is pin-to-pin compatible with the previous u-blox generations, which saves designers time and cost when upgrading their designs.

Related documentation is published on u-blox.com or is available upon request under NDA.

4 Schedule

NEO-F10N initial production samples are available as of December 2023.
